EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, has been amended as follows: "the print server further configured to process the first data stream using the resource table to map the native names if the first data stream to a second font resource in the resource library...." has been changed to "the print server further configured to process the first data stream using the resource table to map the native names of the first data stream to a second font resource in the resource library.."

Authorization for the above examiner's amendment was given in a telephone interview with Daniel Fishman (Telephone: 303-786-7687) on May 9, 2008.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The invention is directed to an apparatus for managing font resources using system independent references. Claim 1 identify the uniquely distinct features of: "the print server further configured to process the first data stream using the resource table to map the native names if the first data stream to a second font resource in the resource library, and generate a third data stream from the first data stream, wherein

the resource table has been modified by the client after generating the first data stream to change the mapping between native names and font resources". The closest prior arts, Kuo et al., US 6,603,478 and Flowers, Jr. et al., US 5,533,174 teach managing font resources using font resource tables & libraries and font servers. Either singularly or in combination with other cited references fails to anticipate or render the above underlined limitations obvious.

The prior arts, Kuo et al., US 6,603,478 and Flowers, Jr. et al., US 5,533,174 disclose generating a data stream using the resource table and sending it to the font server. The font server processing the received data stream using the resource table and generating a data stream for output but does not disclose that the font server is configured to process the first data stream using the resource table to map the native names if the first data stream to a second font resource in the resource library, and generate a third data stream from the first data stream, wherein the resource table has been modified by the client after generating the first data stream to change the mapping between native names and font resources.

The meaning of the sentence "the print server further configured to process the first data stream using the resource table to map the native names if the first data stream to a second font resource in the resource library, and generate a third data stream from the first data stream, wherein the resource table has been modified by the client after generating the first data stream to change the mapping between native names and font resources" is demonstrated by applicant's drawings, and specification.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
